Wisconsin State Senate

July 17, 1990

The Honorable William K. Reilly,
Administrator, Environmental Protection Agency
401 M Street, Southwest
Washington, D.C. 20460

Dear Mr. Reilly:

I am deeply concerned about the air quality of my state and nation, and am constantly in search of ways to reduce air pollution. I have been informed that a performance additive known as HiTEC 3000 may present a real opportunity to substantially improve air quality in the United States.

From the research that I have done on this additive, it seems that HiTEC 3000 has a significant impact in reducing NOx, which plays a major role in reducing smog. I also understand that this additive is compatible with gasolines containing methanol, ethanol and other reformulated fuels.

It is critical that we work together as a team, and fully examine any possible way to improve our nation's air quality. Therefore, it is my hope that HiTEC 3000 is given every consideration by the Environmental Protection Agency, as this additive clearly would be outstanding in this capacity.

Thank you for your attention in this matter.

Sincerely,

A handwritten signature in cursive script, appearing to read "Dick", written in dark ink.
